🌐 maiz-portfolio.vercel.app

📍 Lahore, Pakistan

## SUMMARY

Enthusiastic beginner full stack developer with a knack for problem-solving and teamwork. Built projects like Homyz and Deliveroo using MERN, React Native, and Firebase, showcasing my hands-on skills. Eager to learn, adaptable, and ready to contribute fresh insights and hard work to your team.

My ability to seamlessly integrate diverse technologies, demonstrates my versatility and hands-on experience, making me a standout choice for this job.

## EDUCATION

### Bachelors in Computer Science

#### COMSATS University Islamabad

📅 02/2021 - Present 📍 Lahore, Pakistan

- Accumulated practical experience through numerous projects, participated in CSS Battles and programming contests, honing skills in real-world applications.

GPA

3.3 / 4.0

### FSc. Pre Engineering

#### GC University Lahore

📅 08/2018 - 07/2020 📍 Lahore, Pakistan

- Fostered analytical skills and problem-solving mindset crucial for effective full stack development through mathematics and physics.

Score

84 / 100

## PROJECTS

### Homyz - Real Estate Website

🌐 homyz-real-estate.vercel.app

Implemented a Full-Fledged Real Estate Platform with MERN Stack

- Optimized Performance with React Query and Caching
- Seamless Navigation with React Router
- Efficient State Management using Context API
- Secure User Authentication and Authorization using Auth0

### Lifestream Blood Donation System

🌐 github.com/MaizNadeem/Lifestream-WPF#readme

A blood donation management system that streamlines activities and facilitates with donor information, appointments, and requests.

- Leveraged WPF to design an intuitive and interactive user interface
- Integrated Microsoft SQL Server or Azure Database as the backend

### Deliveroo Clone

🌐 github.com/MaizNadeem/Deliveroo-2.0#readme

Developed a feature-rich food delivery application inspired by Deliveroo using React Native, Redux and Firebase

- Real-Time Order Management with Firebase Firestore
- User-Friendly Authentication and UI using React Native
- Efficient Location Services with Google Maps API
